FAKUMA 2014

HALL B3 BOOTH 3118

Great success encountered at Fakuma 2014!

In comparison with the previous editions, the increasing number of local and foreign visitors, together with better positioning of the booth in Hall B3, contributed to have a continuous flow of people in our booth 3118.

The new compact shut off single nozzle, the special nozzles, the screw-in nozzles for automotive and logistic markets encountered a great interest of customers and prospects.

We returned home tired and very satisfied, so we look forward to next Fakuma 2015.

We thank very much the organizer PE Schall for its support and all the visitors and customers who showed interest to our products once again.
