

FIP, Lyon 13-16 June

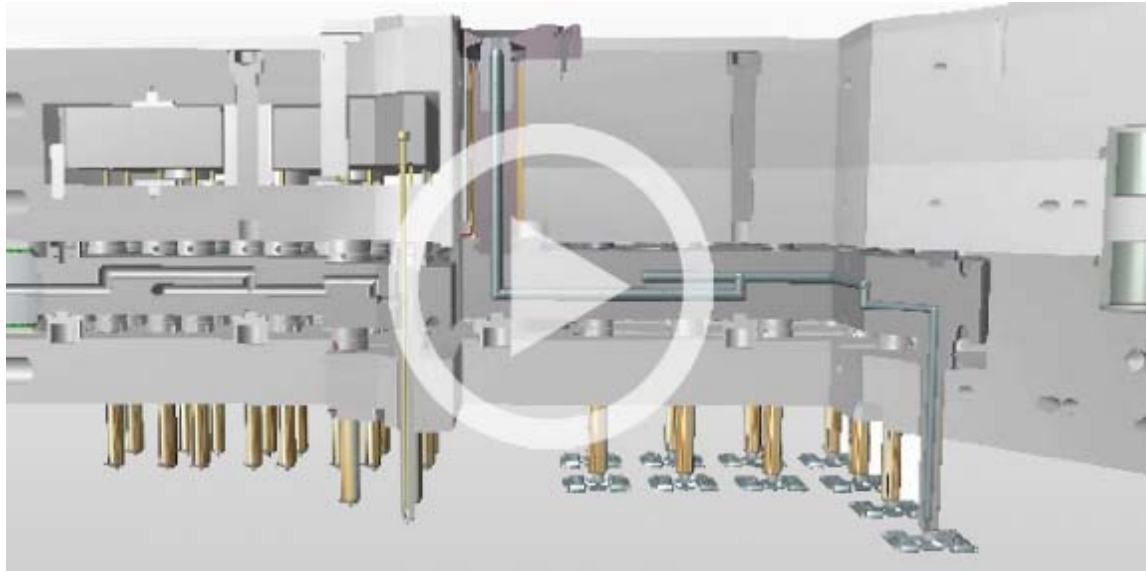

We invite you to visit our **Stand E19**, where we will present our latest hot runner innovations that serve a broad range of customers in the plastic processing equipment marketplace.

Mini valve gate nozzle for small parts

- Nozzle diameter 11 mm
- Small pitch: 13 mm with plate actuated
- Gate area: 0.8 to 1.2 mm
- Possible to inject inside small parts
- Ideal for applications in cosmetics, medical, packaging and etc.

[READ MORE >>](#)

Multimaterial injection with actuation plate

- Compact valve gate system and actuation
- Minimum pitch of nozzles and shut off pins
- Perfect synchronism in opening and closing the cavities
- Mechanical adjustment of needle length, independent on each single cavity (PATENTED)

Temperature controllers

- 16 A for each zone (3500 W)
- Synchronous increase of temperatures
- New smaller boards (max. 6.3 A for each zone) for heating the nozzles ...

Thanks to the strategic partnerships we develop with our customers during the design process, we are able to provide a high level of technical advice, in order to achieve the best solution for any type of injection requirement, thus optimizing the process and tool costs.

Get a complimentary consultation on your injection process with one of our in-booth experts.

We look forward to seeing you at FIP!

Best regards
